National Park Village, Geilo

Geilo is the portal to two national parks, Hallingskarvet National Park and Hardangervidda National Park.

The winter is magical here in Geilo. With snow covered landscapes and a wonderful winter atmosphere, everything is in place for memorable experiences.

Few winter destinations in Norway have so many accommodation alternatives, activities, and service offerings as Geilo.

NATIONAL PARKS

Geilo is the portal to two national parks, Hallingskarvet National Park and Hardangervidda National Park.

Hardangervidda is Northern Europe's largest mountain plateau. It's a fantastic hiking area that also holds Norway's largest national park. The Hardangervidda is an important area for the richest, wild reindeer herds in Europe. In addition, it is the southern-most outpost for arctic foxes, snow owls, and many species of arctic plants and animals.

The Hardangervidda plateau is a popular destination, year-round. During the winter, the most-used winter routes are marked with twigs. The routes are laid by experienced mountain people, who know where it is safe and best to go: dnt.no/vintermerking

The Hallingskarvet is a majestic mountain massive that stretches from Finse in the west to Geilo in the east. The characteristic landscape elements guard over everything and everyone. Around the mountain are miles of inviting, cross-country ski tracks. Several of the ski tracks are tied to the Norwegian Trekkers Association's (DNT) marked trails on the Hardangervidda and the Skarvheimen.

SKARVERENNET

The popular cross-country skiing competition, Skarverennet, goes from Finse to Ustaoset, and is celebrating its 50th anniversary in April 2024. It is 38 km with complete skiing joy along the Hallingskarvet. Package-deals with accommodation and tickets are available at geilo.com.

REST IN THE MOUNTAINS

The mountains offer innumerable possibilities for relaxation, whether you are looking for excitement or mountain tranquility—or both.

Grand and Accessible

Geilo and Hol Municipality are among the best cross-country skiing areas in Norway. Here you will find more than 500 kilometers of groomed tracks, both in the valleys and on the mountain plateaus. Several of these are in connection with the DNT marked track network on the Hardangervidda plateau and in the Skarvheimen mountain area.

Skiing with the Hallingskarvet mountains as a backdrop is a powerful experience. Cross-country tracks crisscross around the Hallingskarvet mountains. The area around Torsetlia has, in addition, 150 km in the middle of the Dagalifjell mountains, on the border between Hallingdal and Numedal.

There are illuminated tracks around the whole municipality: Hovet, Hagafoss/Hol, Geilo, Skurdalen and Dagali. The track around the Ustedalsfjorden lake is as if made for families with children, with information boards about the area's nature and culture.

Geilo's cross-country tracks keep a high standard throughout the whole winter. The ski tracks have a wide specter of skill levels. Everything from short, flat areas for beginners to more challenging routes along the mountain tops.

The cross-country season usually starts at the beginning of November and lasts all the way to the end of April. The most eager cross-country skiers can go skiing in the higher mountain areas until June. All the ski tracks are registered at skisporet.no, where you can find updates from when they have been groomed. The cross-country tracks are free to use, but you are welcome to support the local track and trail group in the area you use most or where you have your cabin/house. For the Geilo area, it is the "Geilo sti-og løypelag." Follow them on Facebook for trip suggestions and grooming updates.

In the mountains, wild reindeer and goats graze; and in the waters, you can find beautiful and red mountain trout. Just as fantastic for dinner as smoking or curing, or other preparations. In the marshes, grow cloudberries; in the woods grow blueberries, crow berries, lingonberries, and mushrooms.

Small and Good

In Geilo and in Hol, you will find a wide selection of small cheesemakers, meat and fish processing companies, restaurants, and bakeries that know to use the valuable ingredients. If you visit the mountain's food service cabins, delicatessens, and grocery stores, they also all offer locally-produced food. Explore and enjoy local food from the mountain. Check out, for example, the Cheese Village. They have their own eco-museum, café, and a world class cheese shop! Don't want to cook? Order catering from Matkroken or Herlig AS.
